

3 à 4 km before reaching the airfield, transmit:

Aspres, Zoulou XY, retour du secteur ouest/sud/est/nord, la verticale dans 2 minutes

Over the airfield, transmit:

Aspres, Zoulou XY, vertical terrain, ZY00 mètres (altitude), pour intégration

**While descending (turning 360°s) observe the windsock, the drift, the turbulence...
as soon as you have decided on wich runway to land:**

Aspres, Zoulou XY, ce sera pour la piste ouest/sud/est/nord

Then make the radio traffic as described on the above map.

Replace *Zoulou XY* by your radio call sign

Replace *ZY00* mètres by your altitude (in meters, or if possible in feet)

Your radio call sign is:
